In early spring, 1983, NEA Research sent out a data collection form in accordance with the New Business Item 1982-83 passed by the 1982 NEA Representative Assembly:

> The NEA, Acting in cooperation with UniServ local affiliates shall establish an information-sharing bank program that identifies school districts where teacher hiring and teacher layoffs are occurring.

The data form contained the names of the school districts within each state that, according to our records, enroll 6,000 or more pupils and, therefore, are likely to employ at least 200 teachers. UniServ coordinators in each state [a/] were asked to furnish the following information for each school district on the list:

1. Corrected student enrollment (if the figures listed by NEA were not accurate);
2. Name of the UniServ unit associated with each school district;
3. Total number of full-time teaching positions as of Fall 1982;
4. Total number of full-time teaching positions projected for Fall 1983;
5. Number of full-time teaching positions to be lost in Fall 1983 due to a REDUCTION IN FORCE; and
6. Number of full-time teaching positions to be HIRED/ADDED in Fall 1983.

The respondents were asked to return the completed data form no later than May 31, 1983, so the data could be compiled and available prior to the 1983 Representative Assembly.

Responses were received from 32 states. More than half of the responses were incomplete for the following reasons:

- o Data would not be available until late summer and/or early fall;
- o Data were not available for school districts in which teachers are represented by a bargaining agent not affiliated with the NEA.

Several states that did not submit reports indicated that they would furnish the information when lay-off/hire data become available.

The following tables show the responses by state. NA indicates that data are not available.

a/ Except Vermont because none of the school districts have an enrollment of 6,000 or more.
